

## PRINT YOUR OWN 60-INCH MEASURING TAPE!

- You will need to print this at its current size for proper measurements, so make sure your printer is **not** set to "scale to fit paper" or "shrink oversized pages to paper size".
- You may print in either color or black and white.
- After printing, cut out each measuring tape and place them end-to-end on a flat surface, face down.
- Attach each tape measure to the next using clear tape or masking tape on the back.
- Congratulations! You now have a 60" measuring tape to use!

Print "Landscape"

Please use this measuring tape to measure for neck size on the "Watermark Medical ARES Questionnaire" form. This should be the 2nd page on the Forms and Questionnaire attachment.

To confirm your printed page is the correct size, this black box is the same length as a \$1 bill.

For males, the neck size should be the same as your dress shirt neck size.
